Gamification in e-Learning

Latest trends in the use of Gamification in designing learning contents in e-Learning mode ...

The term "**Gamification**" defines the use of elements derived from games and of game design techniques, in environments different from gaming.

In our case, we're talking about the use of gaming logics to a very practical application like e-Learning, to promote a better involvement of users.

To achieve this result, it is more and more common to use Gamification elements into online learning courses, pushing students to complete learning modules and/or achieve points and badges.

Discover the latest trens of Gamification in the e-Learning infographic shown here below. And keep in mind that there're many elements in common between infographics and e-Learning: they both share information by visuals.
